---

## PROFESSIONAL SUMMARY

---

Technology and information security leader with deep film/media experience across cloud collaboration, security posture, infrastructure, endpoint support, networking, and user-focused operations. Long-running AFG / Walden Media role evolved from IT/support into InfoSec as infrastructure moved to the cloud and parent-company cyber-security expectations tightened.

## CORE STRENGTHS

---

- Information security operations, cloud security posture, policy alignment, and practical risk reduction
- Box certified; cloud collaboration, identity/access workflows, endpoint support, and user enablement
- Windows, macOS, networking, VPN/firewall concepts, systems troubleshooting, automation, and web technologies

## PROFESSIONAL EXPERIENCE

---

### **Anschutz Film Group / Walden Media | Technology and Information Security | 2004 - Present**

- Shifted from broad IT/support ownership into a security-forward role over the past 9 years as infrastructure moved to cloud services and cyber-security requirements increased.
- Support cloud collaboration, endpoint/user workflows, infrastructure transitions, and security expectations for a media organization with parent-company oversight.
- Translate security requirements into workable business processes while maintaining responsive support for executives, staff, and production/media workflows.

### **Media Tech-Group, formerly JRE International | Founder / IT Consultant | 2010 - 2015**

- Ran an IT consulting firm supporting Walden Media, The Weinstein Company, and other media and business clients.
- Delivered systems support, troubleshooting, network and cloud collaboration guidance, vendor coordination, and security-minded technology operations.

### **Myriad Pictures | Manager, Information Systems | 2001 - 2004**

- Managed technology for an international film production and distribution company, supporting a mixed PC/Mac environment, Windows server infrastructure, multi-location connectivity, VPN/firewall technologies, and administrative automation.

### **QuakeSafe Engineering | Engineering Technician / Systems Developer | 1998 - 1999**

- Helped develop and support proprietary Visual Basic and SQL-based systems for gathering engineering data and compiling reports.

## EDUCATION, CERTIFICATIONS, AND COMPETENCIES

---

- B.S., Engineering - California State University, Northridge
- Box Certified
- M365 / Entra Admin
- Intune Admin
- DevOps
- Microsoft Certified Professional - Windows NT 4.0 Server
- Oracle Database Administrator coursework - UCLA Extension
